

Some Medications Increase Risk of Bleeding

Especially after falls, or when used in combination

Some Examples:

- Heparin & Low Molecular Weight Heparin (Lovenox, Fragmin, Innohep)
- NSAIDs (Ibuprofen, Naproxen, Meloxicam, etc.)
- Warfarin
- ASA
- Plavix

Monitor for signs of bleeding, such as bruising, dark-coloured urine, black/tarry stools, bleeding gums or nosebleed, severe headache
